

Technology Stack

Date	30 June 2026
Team ID	
Project Name	EduGenie – AI Powered Learning Assistant
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML, CSS, JavaScript	Creates an interactive and responsive user interface.

2	Backend / Server-Side <i>(e.g., Node.js, Python/Django, Java)</i>	FastAPI (Python)	Handles API requests and application logic.
3	Database / Data Storage <i>(e.g., MySQL, MongoDB, PostgreSQL)</i>	Google Gemini API	Provides AI-powered learning assistance and content generation.
4	Cloud / Hosting / Deployment <i>(e.g., AWS, Azure, Heroku, Docker)</i>	Local Storage / Application Storage	Stores user session and application data.
5	Version Control & CI/CD	Google Gemini API	Generates answers, summaries, quizzes, and explanations.

	<i>(e.g., GitHub, GitLab, Jenkins)</i>		
6	Third-Party APIs / Other Tools <i>(e.g., Stripe, Twilio, Google Maps)</i>	VS Code, GitHub	Development and version control.
