Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	Edu Genie Repository Link
Programming Language(s)	Python, JavaScript
Framework(s) Used	FastAPI
Key Features Implemented	Question Answering, Concept Explanation, Quiz Generation, Text Summarization, Personalized Learning Path
Pending / Incomplete Features	Advanced Analytics Dashboard (Future Enhancement)
Setup / Run Instructions	Clone the repository, Install dependencies, Configure Gemini API Key . Run FastAPI application

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The EduGenie application is successfully developed using FastAPI and Google Gemini AI. The code follows a modular structure, uses meaningful naming conventions, implements error handling, and is maintained through GitHub version control. The application is fully functional and meets the defined project requirements.
